Tom Morris Gets Good Prices For Holsteins At Ked Deer

Didsbury Holsteins sold well at the Alberta Dairy Cattle Sale held at Red Deer on Tuesday, Sept. 11. This sale was the first to be sponsored by the Alberta Dairymen's Association, and the 65 head of quality foundation stock brought \$246. An average for steers was \$300, for heifers \$305, \$367 and for Jersey \$224.

The highest price was paid for a Holstein cow bred by H. C. P. Elwell of Blackfalds, and was consigned by Richard & Clark of Carstairs. She is a daughter of this grand cow, Tamarae Tulip. Her pedigree goes to Sovereign Masterpiece.

The second highest price of the sale was paid for a 15 month old heifer, bred and consigned by H. L. Ahrens of Red Deer. This heifer, Tipper, from Seymour, was a daughter of a champion milk producing cow that Mr. Ahrens bought for \$1,000 two years ago, and the heifer brought \$885.00.

A 21 months old heifer, Didsbury Joan Sovereign, a daughter of Sovereign, was sold for \$800. Consigned by Tom Morris of Didsbury, she brought the third highest price at the sale, \$775. While Didsbury Jessie Gerben, a 29 month old heifer from Glenavon Egg Apple Archetype, was sold for \$675. These two heifers consigned by Tom Morris of the Didsbury Club, were the top two sellers of \$1,450. or an average of \$75.50—the highest average for a breeder who consigned more than one and half in the entire sale.

Mr. Morris says that there is a great demand for breeding stock from the general public. Applications staled at the Olds School of Agriculture and used for artificial breeding. He has sold young bulls to breeders all over the province this year.

The actioneers for the first sale to be held under the Dairymen's Association were Archie Howe of Olds, Harry Hayes Calgary and Don Ball, Edmonton.

All the top priced animals mentioned above were bought by Mr. Chas. Cox, a veteran breeder of Calgary.

Duck Hunting Season Opens September 22

The hunting season for ducks and geese opens on Saturday, September 22, and with the many pot holes and sloughs now filled with water, conditions are favorable for the duck hunter.

At the present time ducks are reported to be numerous in all parts of the district, and farmers are having difficulty keeping the birds off the swathed grain. Several farmers have secured permits to shoot ducks feeding on their grain, and under these permits the farmer and his family may hunt. Farmers who are allowed to shoot under the permit, ALL permits—must bear the names of the shooters on the field, and no hunting is allowed near water, or with decoys.

While ducks are numerous now, it is expected that as the season advances the birds will flock here in large numbers due to favorable water conditions, and hunters can look forward to a longer season, and farmers near sloughs can expect some damage to swathed grain, unless the ducks can be kept on the move.

Lone Pine Orioles Elect New Officers

The September meeting of the Lone Pine Orioles was held at the home of Grace and Ed. Weber with the highlight being "The Tale of Old Smoky" to open the meeting. Bill Call was paying your membership dues for the new term, and the members are now selling raffle tickets on a quilt to be raffled off in November.

Three officers were elected as follows: President, Jessie McCulloch; vice president, Jessie Elliott; secretary treasurer, Lois Shultz. Shirley Spragg was renominated for secretary.

The three directors are Joy Elliott, Mary St. John and Carol Smith. Mrs. M. H. Shultz has taken Mrs. A. Brander's place as supervisor.

The objective was planning a program for next term.

The ten-cent draw was won by Eileen Weber, and the bit of fun by Joy Elliott was won by Jessie McCulloch.

The October meeting will be held at the home of Jessie McCulloch.

To close the delightful afternoon a delicious lunch was served by the hostess.

Mr. and Mrs. Ed Bersht and Howard and Mr. and Mrs. Sid Wright spent the weekend in Calgary and attended the wedding of Al Mack.

Successful Bazaar Held at Cremona

A very successful bazaar was held in Cremona on Friday afternoon, September 7, in aid of the crippled children fund. Under the direction of the Cremona Service Circle, these industrious ladies had a large display of fancy work, pillow cases, lunch cloths, aprons, etc., to show for their year's work.

There was a table of home cooking which sold readily and an angel food cake made by one of the members sold for \$1.00 a slice. The cake was won by Mrs. R. Simpson.

The main order fish pond created considerable amusement as the gates were opened.

Afternoon lunch was served and the Sewing Circle appreciated the co-operation of the residents of Cremona and district in attending the bazaar. The local Woodmen of America donated the use of their hall for this worthy cause, and also donated \$325 towards the ice cream served during the afternoon.

A net balance of \$147.28 was realized from the undertaking.

Meeetings of the Canada Club are again under way with the first meeting held at the home of Mrs. John Tippe. The first prize went to the states and the consolation was won by Mrs. G. Levesque.

Mr. and Mrs. L. Strickland of Kimberley, Ontario, are visiting with Mr. and Mrs. N. Eby and family.

Mr. and Mrs. H. Ebe and Mr. J. Clausing of Chicago are visiting for a week with Mr. and Mrs. Edwin Eby.

Mr. and Mrs. G. Pearce and Mr. S. Pearce of family of Calgary are visiting with Mr. and Mrs. H. Pearce.

Mrs. Blosom has returned home after visiting for a time at Inglewood.

About 50 Per Cent Of Grain Crop Cut

With favorable weather prevailing this past ten days, harvesting operations are general and it is estimated that about 50 percent of the grain has been cut to date. Except for the delayed and slow start made remarkable come-back although from ten days to two weeks later, most of the grain is now ripe enough to cut and given favorable weather the bulk of the crop will be in stock or swath within the next few days.

Farming communities wanting grain, but being too remote from the present distributing lines to receive it have been able to solve the question of export in the hope that by so doing it might be secured. This is not possible. The only method whereby remote districts can be served is by establishing a port of export. This necessitates the building of a port in the province. As export demands increase so do the gathering lines, making it possible eventually for many of these communities to connect with them.

The picture of the last six months demonstrates very clearly that the only way to obtain grain is by knowledge of the size of Alberta's gas reserves is by export. With permission granted, exploration will expand on a scale of considerable proportion for the reason that a market will await the products of discoveries made.

The gathering on the opening day at the Grant House contained representatives of the applicant companies—Northwest Natural Gas Company, Prairie Pipe Lines Ltd., Western Pipe Lines, Canadian Delhi Oil Ltd., and Westcoast Transmission Company Limited.

Attendance increased by 36 percent at national parks in Alberta during the first eight months of this year, Dan E. Campbell of the Alberta Travel Bureau reported.

Banff National Park remained the most popular destination with a total attendance of 374,494 visitors in 112,737 cars compared with 351,312 in 105,190 cars in the same period last year.

Greatest percentage increase—36 percent—was at Banff National Park. Banff attendance was up 745 percent, but poor summer weather cut attendance at Elk Island Park by 765 percent, and at Waterton by 354 per cent.

Mr. and Mrs. E. Grange who are on a motor trip to California have been having a wonderful trip according to cards received. On September 5th they were at Tonopah, Nevada, and travelled through the desert where the temperature was 10°. On September 6th they were at Elko, Nevada, where they visited the copper mines at Salt Lake, the gambling den of Las Vegas and Reno. They saw the beautiful red woods of California and the rose gardens of Portland.

Mr. and Mrs. A. L. Hogg spent Sunday with Mr. and Mrs. F. E. Lowrie.

THOSE HIGH PRICES

There is no one in Canada who is not concerned about the sky-high cost of living—no one who is not affected. We are chiefly interested not in the causes of inflation (we leave that to economists) but in its effects upon our own pocket books and standard of living.

Since the retailer is the man with whom we deal, we have a tendency these days to regard him as something of a pirate, out to fleece us. "Sam Smith," (our local merchant) we say, "Must be making a young fortune at our expense. Look at the prices he charges!"

We forget that Sam is just as perturbed about those high prices as we are. When the wholesaler raises his prices to Sam, all he can do is pass along the increase. Often he absorbs as much of it as he can and still keep solvent.

The wholesaler, too, is in a similar spot since, by the time the goods reach him, the primary producer, the manufacturer and almost inevitably the government, have had their share of the increase.

It is the old law of supply and demand at work. To get reduced prices in any commodity, either the supply must be increased or the demand decreased or both. At present in the case of many articles the supply is relatively small and the demand is great, not only here but all over the world.

During the last war the Canadian Government did a noteworthy job of controlling prices. The controls were not popular, effective though they were, and they cost the country plenty of money. Controls, subsidies and restrictions of one kind and another do not go over big with Canadians. After the war the government removed controls. The result was a rise in the cost of living in Canada that took our bread away.

Through its policy of high taxation and through too little effort to curb government expenditures, the federal government has not helped the situation. While prices were very low during the war the public paid high taxes but could purchase necessities at relatively low cost due to subsidies and ceilings. Now both taxes and prices are high.

The whole mess is particularly tough on many Canadians—those on salaries which haven't increased in step with increased living costs and increased indirect taxes, the pensioners, the small business men whose turnover is up but whose profit is down.

What is to be done about it? We suggest that Canadians need to roll up their sleeves and produce more. They need to give a fair day's work for fair pay, to work longer hours and produce more goods. At the same time they need to decrease their purchase of goods and increase their savings. Temporarily Canada's high standard of living may suffer.

Canadians do not need to leave this cost-of-living business to their government. They can do something about it themselves once they realize that the law of supply and demand is at work.

**NEW PLANES FOR
OVERSEAS TRAVEL**

An order for five Lockheed Super Constellation aircraft has been placed by Trans-Canada Air Lines at a total cost of \$1,500,000 per aircraft involved.

Purchase of three North Stars and parts from Canadian Pacific Airlines at an aggregated price of \$2,000,000 was also reported by Mr. Metcalf, president of T.C.A.

The Super Constellations, to be delivered in October, will go into service on the Companies overseas routes, while the additional North Stars will enter service early in 1952, providing the expanded capacity needed for system traffic requirements in the immediate future.

The Super Constellation is a 65-ton airliner with a maximum take-off weight of 130,000 pounds, approximately 50,000 more than the North Star. Wing span measures 123 feet and length 113 feet inches.

**BRAZIL-CUBAN TRADE PACT
A BENEFIT TO CANADA**

Great Britain and Cuba have signed a new trade agreement effective on September 9, it was announced in London recently. All tariff concessions now being granted by Cuba as part of her new agreement with the United Kingdom will be automatically extended to Canada under the general nation provisions of the General Agreement on Tariffs and Trade.

Cuba became the second largest market for Canada in Latin America in 1950 with Canadian exports having risen steadily from a value of \$14 million in 1949 to over \$20 million last year. Canadian exports for six months in 1951 reached a total of \$34 million.

**LET YOUR HOME TOWN FOLK
BUILD YOUR COMMUNITY**

The truth of the old adage "Give to the world the best you have and the best will come back to you" is true in all fields of life and in every field of endeavor. By substituting the words "your community" for the "the world," its scope is narrowed to the locale, which you call home. You hold the key to its prosperity, for only you as a community can hold the local merchant in check.

One of the most valuable resources in the building of your community is your young people—graduates from High School and University. Their talents and cultural interests can add much to bring a higher standard of living. However, all too often, this resource is dissipated by the drift of young folks to cities, which offer greater opportunities of advancement. Therefore the problem of your community is how to hold your young people for the mutual betterment of all its citizens.

To solve this problem, the community must be in a position to offer employment to a measure of security. This is best achieved through co-operative, which pays off supports families, while in turn no taxes and support the local merchants. Nevertheless to establish an industry in your community requires men of vision, foresight and action. They may have enough faith in your town to move there, enough initiative to work for it and when opportunity knocks to do something about it.

A good example of co-operative community effort in establishing a local industry comes from Southern Manitoba where the town of Altona, a vegetable-oil processing plant has been set up and last year produced oil and other products valued at well over a million dollars. The oil is used in margarine, shortening and in cooking or salad oil. It is also being marketed nationally. The oil is produced from sunflower seeds, grown by the farmers in an extensive surrounding district.

This industry puts considerable ready cash into the hands of local individuals, provides a large payroll, all of which brings increased prosperity to the local merchants. It was established because a few local farmers and business men had the vision with the necessary faith, initiative and foresight to turn their idea into action.

Your community may not be large, but it may be the centre of a rich supply of raw materials. Furthermore, as far as power rates are concerned, it has the same opportunity to establish industry as the larger communities. Ready Power Ltd. offers the same industrial power rate to all towns in Alberta, regardless of size—Ready Reader, Calgary Power Ltd. Bulletin.

SULPHUR AND PAPER

Trees are not the only thing needed to make paper. Sulphur is a vital ingredient and that is short.

The pulp and paper industry may face a reduction in output early next year unless additional supplies of sulphur are made available. Canadian producers expect to get through 1951 without any cut-back, and they hope to have additional Canadian sources of sulphur by 1953 capable of producing about one-third current consumption. But the period in between may prove critical.

FARMERS LOSING GRADES

The Board of Grain Commissioners' Chief Grain Inspector is sounding an alarm against harvesting wheat on the green side. A number of samples have come in to him which have been seriously degraded because they have contained an amount of green and immature kernels. The Chief Inspector tells of one sample which had to be graded No. 6 which would have graded No. 1 or No. 2 if it could have been harvested a few days longer in the field before cutting. The green and Red Ears wheats, it will be remembered, could be cut well on green side, for these varieties had the characteristic of ripening after they were cut and stood. Green resistant varieties which have ripened earlier do not ripen uniformly, leaving a good part of the kernel stay green and immature, and so degrade the grain.

In these circumstances, therefore, farmers are well advised to allow their wheat crops to ripen well before cutting in order to avoid this costly degrading.

**EATON SCHOLARSHIP MUST BE
SUBMITTED BY OCTOBER FIRST**

The Hon. D.A. Urquhart announced to-day that the first Eaton scholarship for young men in Alberta for the T. Eaton Agricultural Scholarship to be awarded at the Royal Agricultural Winter Fair should be submitted to the District Agriculture by October 1, 1951.

The scholarship which has been made available by The Eaton Co. Ltd., will provide college fees, lodging and board for a four-year course commencing in 1952 at any Agricultural College in Canada selected by the winner.

The scholarship is available to young men who have not reached their 25th birthday by October 20, 1951. Selection of the successful candidate will be made at the Royal Agricultural Winter Fair this fall. Making the selection academic achievement, agricultural organizations, evidence of good citizenship and potential as a leader in community work will be considered. The Minister stated that any young man in the province who wishes to apply for this scholarship should send his application at once, but not later than October 1st to the resident District Agriculture.

*Restaurant Chefs know ...
Aluminum is friendly to food!*

From short order cooks to the head chefs of famous hotels, men who demand the best of kitchen utensils appreciate aluminum.

They know this food-friendly metal protects flavor and quality so well ... and meals are prepared

more easily in quick-and-easy heating aluminum. So ... home cooks ... take a tip from

the experts. Brighten your kitchen with gleaming aluminum. It will lighten your work ... too, because aluminum is so easy to clean.

**ALUMINUM IS FRIENDLY TO
HEALTH**

When you see aluminum used as a food container or wrapper, you can be sure the purity of the product is well-protected. Look for butter in aluminum foil and pies baked in foil plates. And remember that more and more maple syrup these days is made from sap collected in clean, hygienic aluminum pans.

How "Skinny" Girls
Get Lovely Curves

Gain 5 to 10 lbs. New Pep

Thousands who never dieted before, now
have slender, attractive figures. No more long
hours at the gymnasium, no more hours of
feats on bodies skinny because blood lacks from
the body. It will help you get rid of the extra
food burdens you better. Don't let eating fast
hold you back. You can get the new pep
of "get-slimmed" girls every day. Try Curves Today.

Today, at the Gymnasium, Didsbury, Alta.

CANADIAN SOLDIERS IN CANTERBURY
"BOOK OF LIFE"
A special service of remembrance
in Canterbury has been opened. Major
General Sir Tom Gerald Scarlett,
Colonel of the Buffs, handed the
regiment's "book of life" for the
1939-45 war to Canon A.O. Standen,
the Vice Dean of Canterbury, for
safe custody. The book contains
names of 1,222 officers and men of
the Buffs and of the sister regiments,
the Queen's Own Rifles of Canada,
who died in the war.

What About Your Straw?

The heavy growth of straw in Alberta creates the problem of heavy, wet straw, stable, and thick straw cover—but don't let this scare you into burning this valuable fibre and plant food. There are several ways in which this straw can be worked into the ground:

1. A good straw spreader in conjunction with a sharp, well-adjusted disc equipment will handle lots of straw.

Second possibility is to use a straw cutter on the combine. This attachment cuts the straw. This method will have a large amount of straw under the surface, but experiments have shown that conventional drills can seed with a large amount of trash with little difficulty.

Be sure that you leave the straw in the field rather than burn it as this helps improve the soil.

KEEP YOUR AMMUNITION DRY

"Farmers and hunters who have supplies of ammunition left over from the hunting season would be well advised to store it carefully in a cool, dry place," says K.N. Morris of the Ammunition Division of Canadian Industries Ltd.

Properly stored sporting ammunition remains effective indefinitely, he points out. On the other hand, high temperatures or excessive humidity may cause the priming mixture to deteriorate to the point where it will no longer ignite the powder sufficiently to cause a proper load explosion.

At home ammunition should be stored in a locker or cabinet in the coolest, driest part of the house. It should not be stored in a detached garage exposed to the sun, nor should it be carried constantly in a car, that usually is parked in the sun. Excessive high temperatures often generate fire in both these places.

External lubricated rimfire ammunition should be stored in a cool place because lubricant will tend to melt if run hot.

Mr. Morris said: "One fine hand gun ammunition should be protected against the action of powder solvents which many shooters use as cleaners and rust repellents. An excess of solvent may break down the oil proof seal of a cartridge and contaminate the primer and powder."

Lodged shotgun shells should be protected from high temperatures and high humidity. Drying out the powder—as can happen when shells are left in an automobile or truck during hot summer months—is often responsible for uncomfortable recoil.

This led to the discovery that antibiotics such as penicillin, streptomycin and aureomycin are capable of stimulating growth on their own right.

At the present time feed manufacturers are concerned not only with mixtures which contain the "animal protein factor," but they are also adding antibiotics as a source of protein.

Some of these preparations contain antibiotics which had not been removed, and it was found that the antibiotics were more effective at stimulating growth than those which the antibiotic had been removed.

This led to the discovery that antibiotics such as penicillin, streptomycin and aureomycin are capable of stimulating growth on their own right.

-: DISTRICT NEWS:-**WESTCOTT NOTES**

Mr. and Mrs. Will Owens and family were Sunday dinner guests at the Bill Tohm's home, as were Mr. and Mrs. Peter Stakeman and family of Calgary.

Miss Deloyce Goettjen spent the evening with her family, Mr. and Mrs. Herbert Goettjen and Leslie.

Miss Barbara Crossbie is ill with Chicken Pox.

Cutting is general in this area and it is thought that last week's lowering temperatures weren't severe enough to do serious damage as it was a spotty frost with some gardens not touched while others were unharmed.

Mr. and Mrs. Peter Stakeman and family of Calgary called to visit Mr. and Mrs. Herbert Goettjen on Sunday evening and had the evening meal with them before returning to Calgary.

The many Will Carter fans will be interested to know that he was an speaker at the Toronto Ex exhibition recently and in the edition of The Toronto Daily Star went to Mr. H. J. Goettjen by Mr. Alf Brusso, who is holidaying in the east. Will is still stealing the show and the paper carries a photo of the Alton Vodeline Cowboy who has come to the Ex with a story with a lengthy account of his successes and how the song written by Will Carter himself "My Swiss Moonlight Lullaby" is the one asked for repeatedly by his audiences. Mr. Carter will be performing on the tour by his wife and two daughters Carol and Sheila, who too are becoming famous with their tap and ballet dance numbers, accompanied by the yodelling taught them by their famous father.

CAN DEDUCT EXPENSES TO CONVENTIONS

Expenses of lawyers at conventions of the Canadian Bar Association are deductible for income tax purposes, the Income Tax Appeal Board has ruled.

The decision was given on an appeal of H. Fred Parkinson, a Toronto lawyer, against his 1949 income tax assessment.

The Income Tax Department held that his expenses of \$377 would be another item deductible from partnership funds. The board held they were deductible whether applied against partnership funds or his personal income.

FALLEN TIMBER

Mr. and Mrs. Alex Moore had as their guests a week ago Sunday Mr. and Mrs. J. H. Cooper and James and Mr. and Mrs. J. A. Howton, Dorothy and Jeanne.

Mr. and Mrs. Joe McGaffin entertained Mr. and Mrs. Ernest and Joyce and Mr. and Mrs. Moneyer and family recently.

Miss Judy Moore is visiting her grandparents, Mr. and Mrs. Alex Moore.

Mrs. Dick was hostess at a shower held at school for Miss Mary Wannamaker of this district, and Mr. Joe Perkins of Calgary whose marriage will take place in October.

Mr. and Mrs. Joe McGaffin entertain Mr. and Mrs. Ernest and Joyce and Mr. and Mrs. Moneyer and family recently.

Miss Judy Moore is visiting her grandparents, Mr. and Mrs. Alex Moore.

Mrs. Dick was hostess at a shower held at school for Miss Mary Wannamaker of this district, and Mr. Joe Perkins of Calgary whose marriage will take place in October.

Mr. and Mrs. Stein had the misfortune to lose a coat which had been badly mauled by a conger.

Mr. Alex Moore saw a very large bear near Bobby Moore's place. Mr. Erickson said the bear had been frightening his cattle. Deer and moose have also been seen in the district.

Mr. Elyon was a Calgary visitor last weekend.

Mr. and Mrs. G. Admussen and Glenn and James Cooper spent the weekend in Calgary.

Mr. Pat McGaffin went with 45 young people of the IS.C.F. from Didsbury to attend the services held by the Youth For Christ in Calgary.

Mr. John Teynor and Mrs. Esther Roberts visited their mother, Mrs. K. Teynor, last week.

School building progress with Mrs. Leda Cooper as the teacher. There are eight new students all transfers. Unfortunately the school hasn't enough seats to accommodate the twenty-one pupils, causing a great inconvenience to all concerned.

The regular church service and Sunday School was held Sunday September 16, with a good attendance. Special numbers were two orchestra selections and two choir numbers. Everyone is welcome to attend church service at 2:00 p.m. and Sunday school at 3:30 p.m.

M.V.B.C. NEWS

Rev. and Mrs. Willard Swalm have returned to Alberta. Mr. Swalm is a graduate of M.V.B.C. and since then has finished his Liberal Arts Course in Bethel College, Indiana. He is now the pastor of the United Missionary Church at Bergen.

The Hoskins have returned from B.C. with fruit which they canned there at the College. We are glad they had such an enjoyable trip, for in addition they did some services on the Sundays on which they were away. The Sherrick sisters accompanied them.

Lorraine Neufeld, who stays in the school, suffered severe injury to her ankle. She is able to attend High School again.

Mr. and Mrs. Norman Schaefer have been redecorating the apartment in which they intend to live this winter. They are doing a neat job, and expect to have it finished and in order by the time College opens. Both of them have registered classic cars.

Pickling fruit canning is the order of the day around M.V.B.C. Some very fine pickling vegetables have been brought in, and friends have volunteered to help Miss Snyder with this work. We do appreciate it so much, for we feel that there are always those who like to put in spare time.

Word has been received that Mr. Richardson, voice teacher, will be arriving at his home in Delaware very soon. He will spend a few weeks vacation with his parents there before returning to his duties here. Mr. and Mrs. Donald Taylor have had good meetings in Brandon this summer. Mr. Taylor returned earlier and will arrive in Calgary within a few days. He is planning meetings in three or four places in Alberta before returning to his pastorate in Windfield, B.C. Watch for the announcement of this meeting in Didsbury. You will want to hear him.

Mrs. M. A. Finlay of Edmonton a member of the Board of Directors, spent a few days with us last week. We are always happy to have her with us. She returned to Edmonton Friday.

A number of out of town friends have been visitors here recently and have enjoyed looking around the campus. We are always glad to have interested friends drop in to see what is being accomplished.

A taxpaying is a government worker with no sick leaves, no holidays and no vacations.

Mr. and Mrs. Clayton Dippel of Calgary, Mr. and Mrs. E. Dippel and family, and Mrs. Louise Shantz were also present.

**COARSE GRAIN CONTROLS
REPEALED BY ALBERTA**

It was announced from Edmonton this week that Alberta has thrown out legislation which had been designed to prevent grain from self-loading their storage grates to flour, feed and seed cleaning mills.

Agriculture Minister David Ure said the validity of the legislation had been questioned and Alberta was doubtful of its authority to enforce it.

Alberta passed the legislation at the end of last spring as an amendment to the Coarse Grains Marketing Control Act. The purpose was to channel all coarse grain sales other than farm-to-farm transactions through the Canadian Wheat Board.

Ure said, "It is argued that flour, feed and seed cleaning mills come under the Federal control and the province has no authority to pass legislation which restricts or controls their operations."

"The question of whether the province has the power to pass the original control act is still one that is being considered," said Mr. Ure.
